

Fleets can View Hard Brake Events

Hard Brake Event Reporting

The Omnitrac's XRS Black Box Detail Report provides crucial information after a Hard Brake event.

Fleet managers and drivers need to fully understand the status and location of a truck after a hard braking event. Through investigating these critical events, safety managers can provide coaching to drivers, or view information about what happened during a critical event.

What is it, exactly?

The Omnitrac's XRS Black Box Detail Report is used to display second-by-second speed, direction, RPM, Throttle, Brake, Cruise and Clutch around a hard brake event.

Features

- Location data for where the event occurred.
- Engine data around the event.
- Link to FleetView to investigate the event.
- Report view by organization and driver to see all events and locations by date.
- Reports exportable in PDF, Word, Excel, and CSV formats for additional analysis and document retention.
- Alerts configurable on hard brake speed thresholds (e.g. >7 MPH per second).
- Noise filtering to reduce potential for false triggers.
- Quick link to FleetView to see on the map where the event took place.
- Simplified view of events to see major factors in event.

Benefits

- Gives fleet managers insight into what happened during each event.
- Easily identify, at a fleet view level, which drivers are triggering events so corrective action can be taken.
- Gives safety managers a tool for driver coaching and audit support.
- Quickly displays complex data sets in map and report view, allowing for information to quickly be uncovered.
- Quick link to FleetView to see on the map where the event took place.

Getting More from Your Technology Investment

The Omnitracs Alliance Program facilitates integration of Omnitracs solutions with other leading companies that provide complementary technologies and services. This program taps into the power of integration in order to best meet the needs of our shared customers.

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

The Omnitracs Services Portal provides access to a suite of web-based fleet management applications, including satellite mapping. Data from the Services Portal can be integrated into your existing enterprise systems.

About Omnitracs, LLC

Omnitracs, LLC is a global pioneer of fleet management, routing and predictive analytics solutions for private and for-hire fleets. Omnitracs' nearly 1,000 employees deliver software-as-a-service-based solutions to help more than 50,000 private and for-hire fleet customers manage nearly 1,500,000 mobile assets in more than 70 countries. The company pioneered the use of commercial vehicle telematics over 25 years ago and serves today as a powerhouse of innovative, intuitive technologies. Omnitracs transforms the transportation industry through technology and insight, featuring best-in-class solutions for compliance, safety and security, productivity, telematics and tracking, transportation management (TMS), planning and delivery, data and analytics, and professional services.
