

Omnitracs Flex Forms

Flex allows fleet managers, dispatchers, routers and safety managers to easily communicate with drivers.

Fleets need to have standardized ways to communicate between dispatchers, fleet managers, safety managers and drivers. With free form messages, often through text messages or email, critical business information can be lost and the process is largely inefficient. Beyond simple communication, fleets want to share critical information such as arriving and departing shippers, proof of delivery through signature capture, identifying over, short or damaged deliveries, and even on the spot invoicing. The business needs are nearly endless, and the overall return on investment can be tremendous.

Features

- Inbound forms based message from driver to dispatch
- Outbound forms based message from dispatch to driver
- Drag and drop forms creation engine
- Form categories allowing users and drivers to organize types of forms
- Alerts based on form logic
- Form triggers such as driver login, driver logout, stop arrival and stop departure
- Scheduled stops include automated auto arrival and departure based on geo-codes
- Automated forms for requesting real time vehicle or driver data without driver interaction. Inbound automated forms are sent but not displayed to the driver. This can include date, time, location, fuel, motion state, HOS status, odometer, and more.
- Ability for driver to use pinch and zoom form factor with familiar QWERTY keyboard
- Barcode, image and signature capture from the mobile device
- Document scanning using a high resolution camera from the mobile device.
- Multi-page forms for drivers, streamlining interaction with the device
- Sending images and documents to drivers (e.g. Permits)

Benefits

- FLEX allows fleets to focus on the analysis and design of business processes in their company. Where you can be more efficient, save money, communicate more effectively
- Paperless workflow with FLEX removes the pain and lower the cost of doing business. Replace paper processes and the movement of paper within an organization
- Eliminate phone calls, hard written notes, and quick text messages and allows you to build workflow that matters.
- Build custom form sets that can be leveraged by 3rd party or custom built applications
- Automated messaging with limited driver interaction for critical workflow steps.
- Faster invoicing
- Overall better customer service and customer communication
- Better perception of drivers and field workers, enabling them with top of the line technology
- Reduction in back office personal needed to transcribe handwritten driver notes
- Regardless of what devices you use, Forms are displayed in a driver-friendly layout

Getting More from Your Technology Investment

The Omnitracs Alliance Program facilitates integration of Omnitracs solutions with other leading companies that provide complementary technologies and services. This program taps into the power of integration in order to best meet the needs of our shared customers.

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

The Omnitracs Services Portal provides access to a suite of web-based fleet management applications, including satellite mapping. Data from the Services Portal can be integrated into your existing enterprise systems.

About Omnitracs, LLC

Omnitracs is the global pioneer of innovative and comprehensive fleet management solutions transforming the transportation industry through technology and insight. Omnitracs' more than twenty five years of leadership and experience uniquely positions it to serve the industry's needs for seamlessly integrated compliance, safety, productivity, route planning and delivery, analytics, and transportation management system solutions. Omnitracs' more than 1000 employees deliver software-as-a-service based solutions that help more than 40,000 private and for-hire fleet customers manage over 1,500,000 mobile assets in more than 70 countries. Omnitracs' portfolio encompasses Omnitracs Latin America and the solutions formerly known as Roadnet Technologies, XRS Corp, Sylectus, and Omnitracs Analytics. Omnitracs is a member of the Vista Equity Partners group of companies.

Learn how you can use our applications, platforms, and services to reduce costs, increase profitability, and stay competitive. Visit www.omnitracs.com and let us show you how you can save time and money.
