

# Web Browsing

## Bring your office into the cab.

With Omnitrac's web browsing options, your drivers are never far from the office, even if they are hundreds of miles away. Drivers can access fleet-approved websites on their Mobile Computing Platform 110 and 200 (MCP110 and MCP200) web browsers via Open Wi-Fi, or through our Terrestrial Browsing application, which enables browsing anywhere the MCP has terrestrial coverage regardless of Wi-Fi availability.

Web browsing extends the office to the cab by enabling drivers to access critical information such as performance reports, pay stubs, weather forecasts, company news and policies, and training materials. With enhanced access to the information they need, and the ability to stay connected with their company and family while on the road, drivers can be more productive and enjoy greater job satisfaction.

By allowing drivers to complete key tasks, such as online training, conveniently within their own cabs, rather than having to wait to arrive at a truck stop or return to the office, web browsing can help your fleet increase operational efficiency and save valuable time and money.

### Features

- Provides drivers with access to the Internet via the MCP110 and MCP200 web browser.
- Enables fleets to control which websites drivers can access.
- Allows fleets to set up the URL entry bar, favorites, home page and proxy.
- Lets fleets configure the terrestrial data usage allowance by MCP unit set alerts to notify the driver and back office when monthly usage thresholds are reached.
- Terrestrial Browsing intelligently takes into account whether a driver is connected via a terrestrial or Wi-Fi network, ensuring the most economical access to the company portal and other critical office functions.
- Offers cost-effective data plans for the U.S. and Canada.

### Benefits

- Provides drivers with enhanced access to critical information
- Increases operational efficiency across the fleet
- Improves driver productivity and satisfaction
- Reduces operating costs

Omnitracs offers multiple Terrestrial Data Plan size options to meet the operational needs of your fleet and help you manage costs effectively. For more information, visit [www.omnitracs.com/terrestrial-data-plans](http://www.omnitracs.com/terrestrial-data-plans).

## Getting More from Your Technology Investment

The Omnitracs Alliance Program facilitates integration of Omnitracs solutions with other leading companies that provide complementary technologies and services. This program taps into the power of integration in order to best meet the needs of our shared customers.

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

The Omnitracs Services Portal provides access to a suite of web-based fleet management applications, including satellite mapping. Data from the Services Portal can be integrated into your existing enterprise systems.

## About Omnitracs, LLC

Omnitracs is the global pioneer of innovative and comprehensive fleet management solutions transforming the transportation industry through technology and insight. Omnitracs' more than twenty five years of leadership and experience uniquely positions it to serve the industry's needs for seamlessly integrated compliance, safety, productivity, route planning and delivery, analytics, and transportation management system solutions. Omnitracs' more than 1000 employees deliver software-as-a-service based solutions that help more than 40,000 private and for-hire fleet customers manage over 1,500,000 mobile assets in more than 70 countries. Omnitracs' portfolio encompasses Omnitracs Latin America and the solutions formerly known as Roadnet Technologies, XRS Corp, Sylectus, and Omnitracs Analytics. Omnitracs is a member of the Vista Equity Partners group of companies.

Learn how you can use our applications, platforms, and services to reduce costs, increase profitability, and stay competitive. Visit [www.omnitracs.com](http://www.omnitracs.com) and let us show you how you can save time and money.
