

Omnitracs Roadnet Telematics

Simplified Vehicle GPS Tracking

Omnitracs Roadnet Telematics provides a clear, detailed, and immediate overview of how vehicles and drivers are operating.

This technology can save you hundreds of dollars per vehicle every month by monitoring maintenance, engine idling, speed levels, safety issues, and much more.

The two biggest fleet investments — drivers and vehicles — are out of sight on the open road. While drivers may call in at appointed times, you still do not know up-to-the-second driver status or vehicle health.

But, with Omnitracs Roadnet Telematics, that's all possible. By deploying this advanced, full-spectrum solution throughout a fleet, managers can monitor both driver behavior and vehicle diagnostics against selected benchmarks — in real time.

Omnitracs Roadnet Telematics takes fleet management to new levels of compliance, risk reduction, cost effectiveness, and overall productivity.

With this affordable, no-hassle solution, you can:

- Reduce idling
- Optimize vehicle health
- Assess driver behavior
- Monitor critical events
- Eliminate downtime
- Precisely track mileage

Lose the Risk — Not the Driver

Replacing drivers is costly. That's why Omnitracs Roadnet Telematics provides driver-specific information and tools to empower drivers to change the behavior that puts them at risk.

Pinpoint Your Pain Points

Omnitracs Roadnet Telematics lets you focus in on specific risks by driver, branch, region, and more so you can address unsafe behavior and practices.

One Device — All the Answers

Omnitracs Roadnet Telematics is a proven, GPS-based solution that has helped commercial fleets realize significant savings in operating costs, ranging from insurance claims to roadside assistance. The software provides a robust, onboard monitoring technology that tracks a critical spectrum of vehicle operating and usage parameters, such as miles driven, engine faults, idling time, and much more. The result is a clear picture of your fleet's risk, productivity, and maintenance status — and a path toward improvement. Omnitracs Roadnet Telematics can help you:

- Reduce fleet maintenance costs and optimize lease management
- Support green initiatives by controlling fuel consumption
- Reduce injuries, vehicle damage, and claims costs while helping drivers adopt safer habits
- Improve the productivity of your fleet

Reduce Fleet Maintenance Costs through Optimization and Prevention

Utilizing the cost-saving technology of Omnitracs Roadnet Telematics, you can effectively lower operational costs of your fleet. You can also:

- Get the full value from your lease and schedule preventive maintenance through precise mileage tracking
- Manage miles driven to preserve lease and warranty thresholds and slow wear and depreciation
- Optimize fleet size by identifying under-utilized assets
- Track and control speed to extend the life of gears, bearings, clutches, suspension, and drive trains
- Verify proof of service through optional on/off (PTO) monitoring and reporting
- Identify vehicle trends that drive up costs
- Fully integrate into routing and dispatching

Business Insight of Your Fleet.

Track top metrics, produce driver scorecards, and set up parameters to see which drivers need coaching. Download information and even start a discussion with other users. With Omnitracs Roadnet Telematics, you can learn where improvement is needed by specifying factors such as region, worker, and more.

Support Smarter Operations

Want to drive down costs at the pump? Omnitracs Roadnet Telematics can help you eliminate unnecessary miles, reduce engine idling, and promote efficient driving practices — all to lower fuel consumption.

Monitor Risk and Promote Safety

Omnitracs Roadnet Telematics gives you powerful tools to not only monitor risky driving behavior, but also to help drivers eliminate it. Implementing small changes such as controlling speed and limiting after-hours use can mean huge savings for your business in avoiding injuries, vehicle damage, and insurance claims.

See the big picture: Omnitracs Roadnet Telematics lets you monitor a full spectrum of risk factors including speed, harsh braking and rapid acceleration, idle time, stops per day, and after-hours use.

Get More from Your Fleet

By measuring your daily fleet operations, you will be able to better understand the quality of your time investment. Monitoring deviations in time and distance will help you initiate strategies for improved profitability and productivity through a greater understanding of how your customers are being served. With the PTO monitoring option, you can also gain insight into when, where, and how long your employees operate vehicle accessories like pumps, mixers, and compactors.

In addition, reducing speed and other factors that contribute to damage such as wear and tear can help you optimize your preventive maintenance schedule and eliminate unplanned downtime. Thanks to Omnitracs Roadnet Telematics, costs associated with out-of-service vehicles can be reduced by up to 25 percent.

Plus, when combined with routing and dispatching technology, Omnitracs Roadnet Telematics will allow you to get even more data in a single place. Compare the actual route to the plan and know if you're behind or ahead of schedule — and make changes on the fly.

"I share Roadnet Telematics information across our company, from sales reps to the president of the company. It gives each of them data that they can use in day-to-day decision making."

— Frank Spicher, Director of Transportation
Elias Wilf

Getting More from Your Technology Investment

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

About Omnitracs, LLC

Omnitracs, LLC is a global pioneer of trucking solutions for all business models. Omnitracs' more than 1,000 employees deliver software-as-a-service-based solutions to help more than 12,000 customers manage nearly 1,100,000 assets in more than 70 countries. The company pioneered the use of commercial vehicle telematics thirty years ago and serves today as a powerhouse of innovative, intuitive technologies. Omnitracs transforms the transportation industry through technology and insight, featuring best-in-class solutions for compliance, safety and security, productivity, telematics and tracking, transportation management (TMS), planning and delivery, data and analytics, and professional services.

Learn how you can use our applications, platforms, and services to reduce costs, increase profitability, and stay competitive. Visit www.omnitracs.com and let us show you how you can save time and money.
