

Long Haul and Oil & Gas Fleets with Intelligent Vehicle Gateway Printing on Site

Omnitracs' next-generation Intelligent Vehicle Gateway (IVG) suite of applications are now allowing fleet operators to print both full page and 4" documents virtually anywhere when needed

OMNITRACS INTELLIGENT VEHICLE GATEWAY

Omnitracs Intelligent Vehicle Gateway (IVG) is a next-generation telematics solution that supports the Omnitracs suite of best-in-class applications. IVG provides a single, application-enabling platform that reliably scales for the future — whether you're new to vehicle telematics or a telematics-savvy fleet that is managing growth. Fleets constantly look to do more with less while ensuring compliance with the latest regulations. IVG supports a suite of applications that help fleets reduce costs, operate efficiently, and stay compliant.

BROTHER POCKETJET 7 FULL PAGE AND RUGGEDJET 4" PRINTERS

Brother's compact in-cab mobile printers give drivers the ability to quickly print a range of documents, helping save time and money while avoiding delays on the road. Both Brother mobile printer series are certified for use with the Omnitracs IVG solution, and offer Brother's renowned reliability as well as the latest in connectivity and compatibility. Each printer is supported with a complete line of Brother Premium thermal media, custom labels, tags, and tickets to fit a host of industrial applications. The printers are also equipped with Brother's exclusive "bumper-to-bumper" warranty.

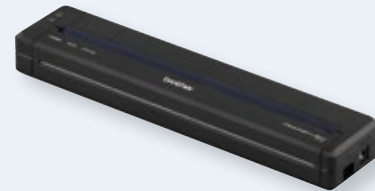

OMNITRACS INTELLIGENT VEHICLE GATEWAY

- Intelligent Voice Interface enables hands-free access to key information
- New, intuitive message notifications reduce driver distractions
- Scanner, printer and accessory connectivity via Bluetooth
