

Omnitracs

# Omnitracs One Platform + McLeod LoadMaster

The integrated Omnitracs One and McLeod LoadMaster experience: enhancing the drivers quality-of-life while out on the open road

## Integrated fleet management: putting shared data to work for you

Integration features:

- Driver workflow trip management
- Stop-specific task updates: shipper, intermediate, consignee and more
- Task-driven stop based on stop type: arrive, depart and smart tasks
- Multiple tasks per stop
- Integrated ELD / HOS availability clocks
- Geofence Auto-Arrival & Depart Events
- GPS breadcrumb trail reporting
- Inbound image and signature capture retrieval
- Commercial grade turn-by-turn directions
- Driver messaging

## Integration benefits

Quickly collect signatures, scan documents, and trip-related photos

Guide drivers through tasks and forms per stop to eliminate confusion

Reduce human error for more consistent data collection

Instantly share data, documents, and images with the back office

Trigger actions such as notifications based on arrivals and departures

Stay up to date on potential impacts to route plans

# The extra mile

## Omnitracs One Platform highlights

### Platform-driven innovation

Add or remove applications as your needs change while maintaining consistent back-office and driver user experiences.

### End-to-end cloud infrastructure

Gain enhanced stability, reliability, and system/application performance.

### Better data - better results

Get all your fleet data at your fingertips, without restrictions.

### Open & flexible APIs

Share data with integration between McLeod LoadMaster, other 3rd-party solutions, and fleet operations systems.

### Mobile device freedom

Choose the device form factor that provides the best experience for your drivers.

Omnitracs Drive presents trip information when drivers need it - during the appropriate time of the trip.
